Dedication

The class of 1964 is proud to dedicate the Mainstay Yearbook to Professor Leo Sullivan, the Chairman of the Social Sciences Department.

His many years of patience and perserverance in acting as the Yearbook's advisor merits for him the place of honor, not only in our class-book, but also in our gratitude.

We wish to acknowledge our appreciation for Professor Sullivan's many hours and concrete advice concerning the problems of publishing the Mainstay.

"And so, my fellow Americans: ask not what your country can do for you—ask what you can do for your country.

My fellow citizens of the world: ask not what America will do for you, but what together we can do for the freedom of man.

Finally, whether you are citizens of America or citizens of the world, ask of us here the same high standards of strength and sacrifice which we ask of you. With a good conscience our only sure reward, with history the final judge of our deeds, let us go forth to lead the land we love, asking His blessing and His help, but knowing that here on earth God's work must truly be our own."

Inaugural Address

John Fitzgerald Kennedy

January 20, 1961

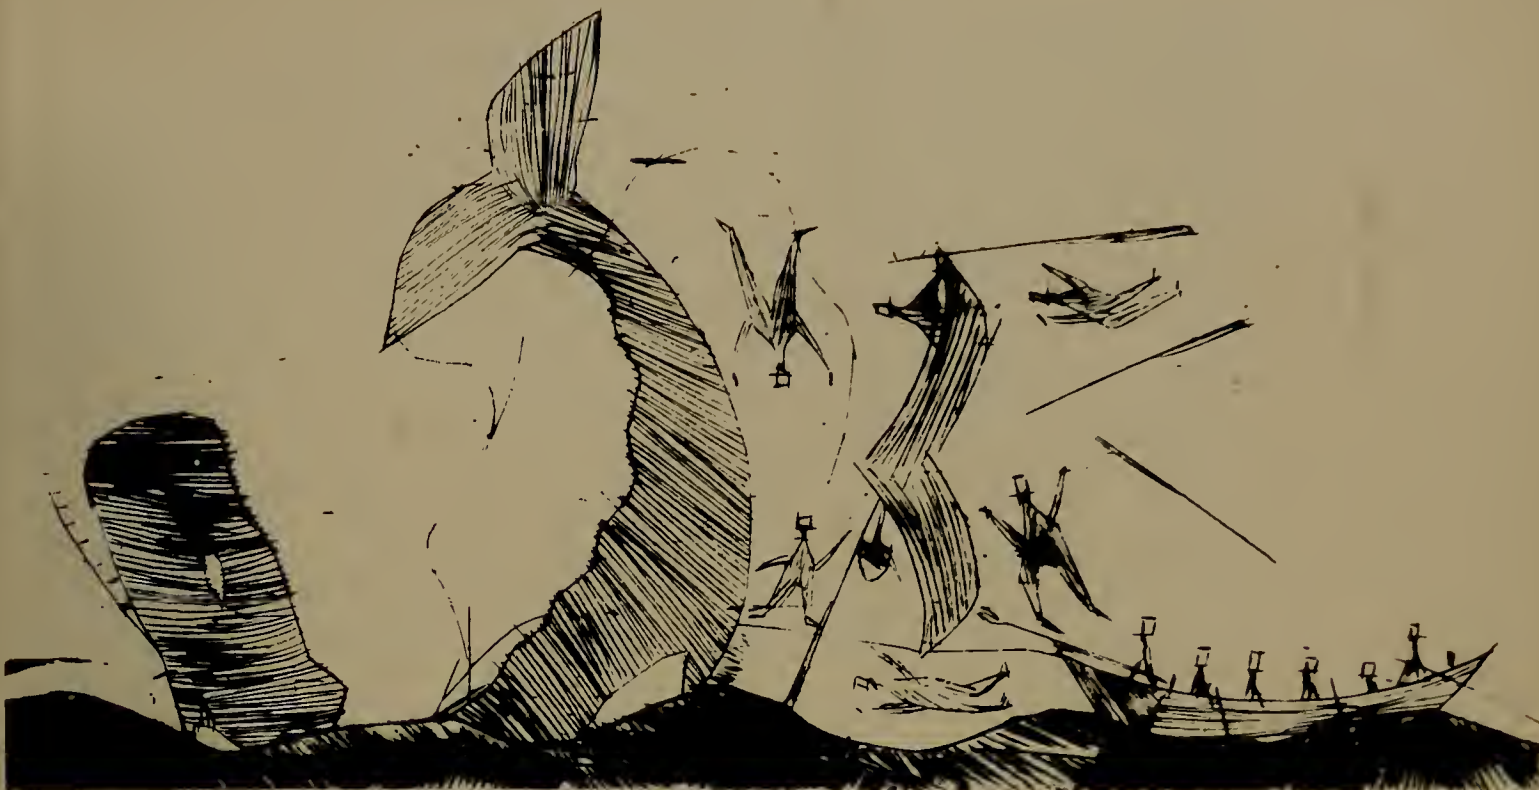

John Fitzgerald Kennedy

1917 - 1963
35th President of the
United States

. . . and so, my fellow Americans: ask not what your country can do for you—ask what you can do for your country.

INAUGURAL ADDRESS, JANUARY 20, 1961

Because of the rich, historical background of the City of New Bedford, we are indeed fortunate to have in this city a museum of national historical significance. With this rich historical background in mind, the year-book staff, in using New Bedford's historical past as its theme, wishes to acknowledge the invaluable assistance rendered them by the:

Old Dartmouth Historical Society

President's Message

TO THE GRADUATING CLASS OF 1964:

In the last four years you probably have had many hours of anguish and discouragement. However, in approaching graduation day the exhilaration of pondering the vast opportunities awaiting you should cancel the trying times. In leaving New Bedford Institute of Technology only the fond memories of fellow students and mentors should remain in your thoughts.

Throughout the succeeding generations, it is necessary to keep in mind the moral as well as the intellectual benefits received during your college career.

In conclusion, I wish you all the best of luck and health in your future endeavors.

Dr. John E. Foster

Senior Class Officers

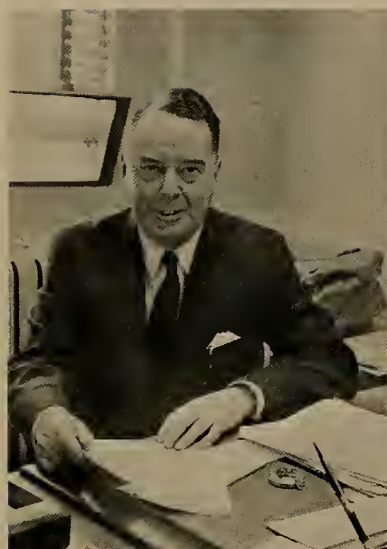

The Senior Class Officers; President, Stanley Gastar; Vice-President, Sidney Smith; Secretary, Claire Per-rault; and Treasurer, William Fontes, were elected by the Senior Class members. Their function is to promote the interest of the students and to supervise the many activities sponsored by the class. These four officers are members of the Student Council, which is the governing body among the students.

The Class of 1964 is very fortunate to have four fine and competent officers and wishes to thank these officers for a hard job well done.

This year turned out to be a better year than was expected, for "Tech Talk" started off without a layout staff, a deficiency in reporters, and quite a few members who had very little experience in newspaper work. Controversy was no stranger, what with many articles that, in the past, would never have been printed. Nothing was kept out of the paper that was felt to be of student interest. Even with this drastic change in policy, few enemies were made. With a maturing staff, the errors have grown to be few, and next year a better newspaper will be the result of this growth and interest shown by the staff and students.

This year the biggest happening in the office, aside from the countless debates, was that the office was finally refurbished. Circle "K" supplied most of the labor, which cleaned, repainted, and polished the office to a state it hasn't seen for years. A new furniture arrangement was introduced which has proved more effective than the previous setup.

Thus with a new staff, and a new office, we have finished this year in a much better position than what was envisioned in the green days of September. This year we will lose several key members, but with their foresight in training their subordinates, this void will be filled. To this year's graduating class, "Tech Talk" sends its best wishes of good luck in the business world.

TALK

Institute of Technology

The Institute of Electrical and Electronic Engineers Student Branch is a result of the joining of the American Institute of Electrical Engineers and the Institute of Radio Engineers in 1963. At that time students at the New Bedford Institute of Technology were already deriving the benefits that accrued from this merger of two great professional organizations, as an A.I.E.E.-I.R.E. Joint Student Branch had been maintained at the school since the spring of 1960.

The program of the I.E.E.E. Student Branch Chapter is designed to aid and encourage the professional development of student electrical engineers. Weekly lectures, films, and distribution of technical literature are supported by occasional field trips to industry or government sites in giving the student a broad picture of professional engineering practices. In November of each year, the Branch participates in Electronics Week activities by assembling displays at school and in downtown New Bedford. A scholarship fund, financed through the members' efforts, is used to provide scholarship monies awarded at Class Day Exercises each year.

I.E.E.E.

N.B.I.T. Mechanical Engineering Club

The M.E. Club is designed to further the knowledge and education of the engineering students at Tech and to better the business contacts between the student engineer and related industries. The club seeks to foster professional attitudes in its members by exposure to engineering speakers at dinner meetings, films related to engineering topics, and tours of industrial plants. Social contacts between students and faculty are also encouraged at dinner meetings, dances and other functions.

The officers are: President, Daniel Pacheco; Vice-President, Peter Saulnier; Corresponding Secretary, Wayne Snell; and Treasurer, Francis Wacławik. The Faculty Advisor is Professor V. Louis Roberts.

American Chemical Society

American Association for Textile Technologist

This organization, formed in February of 1958, was originally called the Textile Engineering Club. In March of 1962 it received its charter, becoming the first student chapter of the American Association for Textile Technologist.

The objects of a student chapter of AATT are to provide students an early means of becoming associated with the organization of AATT and to advance at the local level the aims and goals of the parent National Association which are to encourage

mutual understanding in the fields of textile technology and marketing; cooperation with established facilities for textile education; and the interchange and dissemination of professional knowledge among its members and with other industry groups. The officers for the present year are: President, Ronald C. Yates; Vice-President, James Texeira; Secretary, Harry J. Batty, Jr.; and Treasurer, Robert Axtell.

Management Club

The New Bedford Institute of Technology Management Club is a student organization which attempts to give the junior and senior majoring in Management a greater understanding of the problems and practices in all areas of business.

The Senior officers, who were elected in May, 1963 and served until Jan. 1964, were: Sidney Poole, President; William Fontes, Vice-President; Pauline Levasseur, Secretary; and James Kenney, Treasurer.

Circle K

Circle K Club is a service organization which functions both internationally and locally. In the past years there has been invaluable service performed to the school and the community as well. Members of the New Bedford Tech Circle K have participated actively in all levels of Circle K, sending its representatives to the organization's International and District Conventions.

This past year, the Circle K Club of New Bedford was awarded the District Single Service Award. The class officers are: President, Frank Rezendes; Vice-President, Fred Friedberg; Secretary, Kenneth Goulart; Treasurer, George Perry; Faculty Advisor, James Flannagan; Kiwanis Advisor, Bruce Borden. With the lack of campus life here at Tech, one of the services of the fraternities is to provide recreational pursuits for their brothers. Nu Beta Tau Fraternity was organized as a social fraternity when a group of enterprising Sophomores recognized the need for a third fraternity, one having no professional affiliations, to provide social activities for men in all majors at Tech. The organization received its charter in 1958 and, after the efforts of four years, leased and renovated a Fraternity House at 237 Middle Street, New Bedford, Mass.

Nu Beta Tau was the first fraternity in this area to substitute "Help Week" for "Hell Week." This innovation has been well-received both here at school and in the surrounding communities. Non-profit organizations such as St. Mary's Home and the New Bedford Boy's Club have profited from the use of pledge labor.

Social functions sponsored by Nu Beta Tau include the "Pumkin Prom," held during the Halloween season, and many popular parties at the fraternity house facilities.

Delta Kappa Phi

Delta Kappa Phi Fraternity is one of the oldest national fraternities in America. It is listed in the World Almanac and the Blue Book of professional fraternities. The members of Delta Chapter are matriculating in chemistry, engineering, textile and business administration courses offered here at New Bedford Institute of Technology. With campus life limited as it is here at Tech, the student has to turn to a fraternity for the social aspect of college life. D. K. brings into realization this desire of its members through the use of its large fraternity house located at 54 Campbell Street.

The purposes of the Fraternity are many. For the school Delta Kappa Phi is a service organization. The Fraternity continually strives to advance the aims and interests of the school through the various projects, services, and activities of its members. For

the members the Fraternity is an inspiration to high scholastic achievement by encouraging its members in acquiring a thorough education in the courses of their choice. The fraternity relationships and social enjoyment gained by the members assists in forming the bonds of friendship between men of common interests. By encouraging active participation of the members in all school activities, athletics, and other functions, the Fraternity serves to promote a well-rounded character development. For the industry the Fraternity functions to furnish professional men of high caliber for executive and managerial responsibilities.

The officers are: President, Andrew Dufresne; Vice-President, John McDermott; Correspondence Secretary, James Teixeira; Recording Secretary, James Porte; Treasurer, Jeffery Lewis.

Phi Psi Fraternity was founded at the Philadelphia College of Textile Engineering in 1903. The following year "Tech" received its charter and was officially named as Beta Chapter. The primary aims of the fraternity have been to promote good fellowship, high scholastic achievement, and mutual advancement of its members and the art of textile manufacturing. In view of modern technological changes both in management and production methods, recent constitutional amendments have been made whereby non-textile majors are encouraged to join this fraternity when their skills are such that they complement the

successful operation of the textile industry.

Phi Psi Fraternity is the largest professional fraternity of its kind with ten active chapters and twelve alumni chapters extending along the Atlantic Coast and through to the South-West.

The officers are: President, John R. Ganson; Vice-President, Stanley Gastar; Secretary, Charles Manley; Treasurer, Daniel Costa. Professor Edward Cloutier is the Faculty Advisor. Committee Chairmen are: House, Wayne Snell; Bar, Walter Shepard; Pub. Rel. Daniel Pacheco; Social, Jeffrey Jackson.

Phi Psi

Kappa Sigma Phi

The Kappa Sigma Phi Sorority consists of 23 sisters whose purpose is the exchange of knowledge, sincerity, and fraternity. The Sorority was established on the 27th of October 1943, at Philadelphia Textile Institute. The official colors are purple and white. Purple representing the high ideals which the Sorority stands for and white representing the purity of purpose. The official flower of the Sorority is the Iris.

This years activities consisted of several successful couples parties sponsored in conjunction with Delta Kappa Phi Fraternity, a raffle, open house for new members, faculty luncheon, faculty-senior class buffet, a tea was given for the mothers of the girls. This year we sponsored an Apache Indian girl, Lorena Mae Wright, through Save the Children Federation.

The Present officers are Nancy Moore, President; Judith Catlow, Vice-President; Jane Booth, Treasurer; Nancy Lussier, Secretary; Mary Ann Lomba, Officer of Discipline; Faculty Advisor, Vivian Zerbone.

Chi Delta Phi Sorority is comprised of 28 sisters matriculating in the business administration, the textile chemistry, chemistry, and textile design and fashion departments here at the Institute. The Sorority was established on March 5, 1963 with the aims of furthering friendship between the women at the Institute. This is accomplished by providing social activities and activities of benefit to the school and community in which the sisters may partake.

The colors, pink and white, are held as the traditional colors of the Sorority, and the pink chrysanthemum as the Sorority flower.

Included in this year's activities are an open house buffet for prospective members, a hayride, couples party, Christmas caroling, a fashion show, a social dinner at the home of our faculty advisor, participation in the inter-sorority basketball game sponsored by the Circle K, a ski weekend, and our annual car wash. At Christmas-time the sisters also adopted a family of eight; this was a very rewarding experience.

Officers are: Betsy Damos, President; Carolyn Martin, Vice-President; Gail Norton, Recording Secretary; Nancy Cairns, Treasurer; Kathleen Blake, Pledge Leader. Our faculty advisor is Miss Claire Riley.

Left to right in front row are Jim Gardner, Henry Gambardella, Ed Emmet, John Kidd, and Ed "Swede" Silva. In the rear are Head Coach Bill Doyle, Tom Mendell, Dave Williams, Paul Fredette, Bruce Violante, Ken Leonard, and Assistant Butch MacNamara.

Cheerleaders

The cheerleaders were among the most active groups this year. The squad consisted of nine girls; Doreena Ferro, Carolyn Gonet, Gail Norton, Susan Bellotti, Sharon Fabio, Marcia Crowell, Noreen Medieros, led by Carol Meia.

The trip to Montreal with the cheerleaders moral support was a most memorable and exciting event. The cheerleaders were particularly proud to lead the basketball team through a very victorious season. Each girl showed a great deal of spirit and support. To Carol Meia a vote of thanks for her leadership and devotion to the squad. May she find success and happiness in all her future endeavors.

We regret the untimely death of Miss Lea Custodio. Her absence will be felt not only on the cheering squad but by all who knew her. Her winning smile and cheery disposition added a spark to the squad. She will be remembered always as an outstanding student and a friendly individual.

Special TEXTILE DICTIONARY for BEST RESULTS in Textile Processing

C

Corobex (Kôr 'a-bex)

A durable anti-bacterial additive for textiles. Provides fixed, lasting protection against germs, mildew, perspiration odors and other odors of bacterial origin.

Easily applied during dyeing or finishing operations. Will cause no shade change in dyed and printed colors, no yellowing of whites. Does not affect the hand of the finished goods. Compatible with most types of finishing materials.

D

Discolite* (dīs/kō.līte)

Concentrated sodium sulphoxylate formaldehyde available in lump, pea, rice or powder form.

A powerful reducing agent, stable at high temperatures. Widely used to effect reduction and solution of vat colors, and for discharge effects when applied to colored grounds. Effective when mixed with vat colors and discharge pastes wherever the reducing agent must retain its reducing power after being dried into the fabric.

Dispersall (dīs.pûr/sai)

A long chain ethylene oxide condensate in the form of a colorless, neutral, somewhat viscous liquid. Fully resistant to hard water, and miscible with water in all proportions. A retardant and leveling assistant in vat dyeing.

Used widely as a dispersing agent in dyeing synthetic fibers with disperse colors and for fast color salts and bases in Naphthol dyeing and printing.

Effective in stripping to prevent redeposition of the color on stripped goods.

N

Neofinish (Ne/.O.Finish)

Non-Ionic softener dispersible in hot water, suitable for all textile fibres, both natural and synthetic. Compatible with all types of finishing materials, including resin finishes. No development of color or odor in goods finished with Neofinish, even in storage. No yellowing at time of application.

Neowet (nē/ō.wēt)

Complex Polyethylene Ether in the form of a pale yellow, slightly viscous liquid.

A non-ionic surface active wetting agent, effective at all temperatures. Completely compatible with enzymatic desizing agents and readily soluble in water. Contains 33 1/4% active ingredients. Widely used in scouring all types of textile fabrics and for general wetting purposes.

Neowet X (nē/ō.wēt)

Organic Ether Sulphonate in the form of a water white slightly viscous liquid.

An anionic surface active wetting agent, effective at all temperatures. Does not affect enzyme activity in desizing. Compatible with hydrogen peroxide and resin finishes. High detergent value. Contains 20% active ingredients.

Neozymes* (nē/ō.zīms)

Desizing agents made up of amylolytic, proteolytic and fat splitting enzymes available in the form of crystalline powder or liquid concentrate for high or low temperature requirements.

Neozymes quickly remove all trace of starch glue or gelatin sizing without danger of damage to even the most delicate fabrics. For best results, use with NEOWET to speed saturation.

P

Parolite* (pār/ō.līte)

Zinc sulphoxylate formaldehyde in the form of white crystalline powder. A highly concentrated stripping agent for all forms of wool and modern synthetics.

Completely soluble in water. Leaves stripped goods soft, completely free of zinc dust and in most receptive condition for further processing. Often completely strips goods where other stripping agents fail. Very effective in discharge printing on acetate rayon.

V

Vatrolite* (vāt/rō.līte)

Concentrated sodium hydrosulphite in the form of white crystalline powder. A powerful reducing agent for vat colors, ideal for dry feeding because of its free flowing, dustless character. Completely soluble in water.

Effective stripping agent for direct, sulphur and vat colors on cellulosic fabrics.

Quickly removes rust stains from cotton goods. May be stored indefinitely.

Available with optical whites and in buffered formulas for high temperature use without excessive alkalinity.

Velvo Softener (vel/vō)

A highly sulphonated tallow in the form of a creamy white paste, easily dispersed in water. Used in general finishing of all types of textile fabrics. Will not "smoke off" or change color in high temperature operations such as calendering or drying. Has no effect on light fastness of colors.

Strategically placed warehouses plus company owned trucks add up to fast dependable delivery, every time.
